THE WUSH BAG CHECKLIST

Wake Up, Stuffs* Happening · the original, since 2018

A WUSH Bag is a small grab-and-go bag that sits next to your bed, for the night you have about 60 seconds to get out: a house fire, a gas leak, a flood or an evacuation order. It is not a mini bug out bag. It holds what you need to restart your life, and nothing that slows you down while you grab the kids and pets.

Next to the bed
Nightstand, under the bed or on the bedpost. Within arm's reach.

Small, one strap
A sling or messenger bag so both hands stay free.

Out in seconds
Grab it, grab your people, go. Everything else can be replaced.
